

ZO

DENZA AND STAK

watson

Understanding ZO

ZO is designed with flexibility and choice in mind. Pick the height, size and desired function of the Denza, then select ZO Base and ZO Stak options to suit. Any Stak can mount to any Denza using a tool-less bracket. The bracket retains the

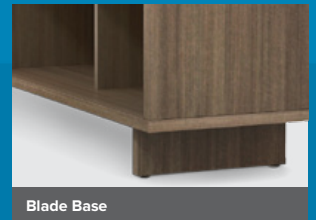

alignment of the storage units, but enables the Stak to slide easily across the Denza without marring the surface. Other accessories, like whiteboard or tackboard privacy screens, also easily mount to the Denza.
